

BECOME A CMN MENTOR!

Share your skills and expertise with others to contribute to the improvement of care for patients suffering from chronic pain and substance use in your practice.

Together, we can change the lives of thousands of patients in Alberta!

CMN Overview:

The Collaborative Mentorship Network for Chronic Pain and Addiction (CMN) addresses the urgent need to build capacity within primary care teams in the areas of chronic pain and substance use. The CMN supports evidence-based knowledge translation, education, and mentorship opportunities for its members, with a harm reduction focus. It creates a community of practice that allows colleagues to connect with one another for educational events, discussion, and mentorship.

Why Become a Mentor?

Connect With Peers

Mentors share their expertise and experience in pain management and/or addiction with colleagues looking to learn more.

Remuneration

Mentors are remunerated for the time they provide.

Flexible

Mentorship is flexible – averaging at about 1-2 hours spent on mentoring per month.
